

User's manual

Four screens are shown: one large and 3 smalls. The small ones represent three different views. The large one of the three views enlarged. The user can choose which of the three views is presented on the large part of the screen by pressing '1', '2', or '3'.

To turn on/off the representations of axis and orbits press 'a'.

To see the movement of the planets, press 'r'.

When the Earth is selected by clicking on it, it is showed from up close (view 2).
